CIS 335

Business Applications Development Using Visual Basic

Instructor

Dr. Selwyn Ellis  
CoB 203  
257-3886  
ellis@latech.edu

Office Hours

8:00 – 11:00  Tuesday and Thursday
8:00 – 10:00  Monday and Wednesday

(If for some reason I am not in my office at the times listed above, please leave a phone or e-mail message so that I can get in touch with you.)

Textbook

Supplies

USB drive to leave me with me (to be returned)

Content

Provides an overview of business applications programming using object oriented programming techniques. Programs and projects are used to help students advance in their ability to write business application software.

Grades

Grades will be based on three exams, outside programming assignments, and other assignments

92 - 100 %  A
84 - 92 %  B
76 - 84 %  C
68 - 76 %  D
Less than 68 %  F

Exams

Three exams will be given throughout the quarter. If you must miss one for any reason, please try to let me know ahead of time. If you miss the test for an unexpected reason, see me as soon as you can after the test date. If you have an unexcused absence on a test day, you will get a zero on that test which will be averaged in with your other grades. If you have an excused absence for a test day, you will be allowed to make up the test on the day of the final exam.

Attendance

Class attendance is regarded as a responsibility. I expect all students to attend class regularly and punctually.

All assignments are due on the due date—even if you cannot be in class that day. You can get someone to turn them in for you.
A permanent attendance record will be kept for each student in this class. These attendance records are subject to inspection by appropriate college or university officials at any time. It may be when you are put on probation or suspension, when you apply for a scholarship or graduate assistant job, or when being considered for an award. All official university excuses will be accepted for an absence.

**Tentative Schedule** *

<table>
<thead>
<tr>
<th>Week</th>
<th>Topic</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Review of the Introduction to VB 2010</td>
</tr>
<tr>
<td>2</td>
<td>User Interface Design</td>
</tr>
